

What can I do with my cannabis license?

Cultivator License

Cultivator licensees may grow cannabis plants, either outdoors, indoors, or a mix of indoors and outdoors.

Cultivators may also **dry cannabis, package it, create pre-rolls** out of flower and/or trim, and sell it to other cannabis establishments. They may **produce clones** for sale to other licensees, including licensed retail establishments.

Cultivators may not conduct any extraction, including mechanical extraction. Mechanical extraction means extraction by means of mechanical or manual sifting and pressing as approved by the Board.

They **may not possess cannabis products**, and **they may not sell to the general public**.

Cultivators may make **agreements with manufacturers** to have the **cultivator's label put on cannabis products** that are manufactured with the cultivator's plant material.

7 V.S.A. § 904; Board Rule 2.3, 2.4, and 2.5

Wholesaler License

Wholesaler licensees may purchase cannabis and cannabis products from other licensees and sell them to licensees.

They may package cannabis and cannabis products and may create pre-rolls out of flower and/or trim.

They may not sell to the general public.

7 V.S.A. § 905; Board Rule 2.7

Testing Laboratory License

Testing Laboratory licensees test cannabis and cannabis products obtained from a licensed cannabis establishment, dispensary, or a member of the public.

All cannabis and cannabis products sold must be tested in accordance with Board Rules.

Testing laboratories test for product potency and purity across a variety of metrics. **They may not sell cannabis to the general public or to other licensees.**

7 V.S.A. § 908; Board Rule 2.9

Manufacturer License

Manufacturer licensees may create products from cannabis plants; including edibles, oils, tinctures, and other such products.

There are **tiers** of manufacturing licenses depending on the **types of extraction methods used and amount sold.**

Tier 3 manufacturers may use any lawful method of extraction, including supercritical CO2 extraction, flammable solvent chemical extraction, and flammable solvent chemical synthesis.

Tier 1 and 2 manufacturers may use the following extraction methods:

- **Mechanical Extraction:** extraction by means of mechanical or manual sifting and pressing as approved by the Board.
- **Water-Based Extraction:** extraction using only water, ice, or other freezing substrate or process as approved by the Board
- **Food-Based Extraction:** extraction using propylene glycol, glycerin, butter, coconut or olive oil, other typical cooking fats, or alcohol as approved by the Board.
- **Heat/Pressure-Based Extraction:** extraction using heat and/or pressure as approved by the Board.

Manufacturers can package their products and sell them to other cannabis establishments. **They may not sell to the general public.**

7 V.S.A. § 906; Board Rule 2.6

Retailer License

Retail licensees may purchase cannabis and cannabis products from other licensees, and they may package and **sell cannabis and cannabis products to the general public.**

Only **retailer licensees** and the retail portion of integrated licensees **may sell to the general public.**

7 V.S.A. § 907; Board Rule 2.8

Integrated License

Integrated Licensees may engage in the activities of each of the license types: cultivation, manufacturing, wholesale, testing, and retail.

These licenses are **only available** to an applicant and its affiliates that hold a **medical cannabis program dispensary registration** on April 1, 2022.

7 V.S.A. § 909
