

PACKAGING CANNABIS FLOWER VS. EDIBLES AND OTHER PRODUCTS

What needs to be where?

CANNABIS:

Flower and pre-rolls without any additives are "cannabis" and must be in **child-deterrent packaging**. Opacity is not required.

CANNABIS PRODUCTS:

Edibles and concentrates, including dipped pre-rolls, are "cannabis products." These must be in **opaque** and **child-resistant packaging**.

CHILD-DETERRENT

For packaging to be child-deterrent, it must be **tear-resistant**, and difficult enough to open that it would **discourage a child** under five from accessing the contents.

CHILD-RESISTANCE

This is a federally-defined term. Packaging must meet criteria set by the Consumer Product Safety Commission before it is labeled child-resistant.

Child-resistant packaging must be **significantly difficult** for a child under five to open within a reasonable amount of time, but not difficult for adults to open.

Child-resistant is *not* child-proof – some children may be able to open resistant packaging. **Always lock up your cannabis.**
